EXPERIENCE

- GoAvo AI (DevrelSquad)** Remote
Software Development Engineer Intern Feb 2026 – Jun 2026
 - Architected an automated outreach pipeline combining **MongoDB Vector Search** for semantic lead discovery with **AWS SES** for bulk delivery, accelerating targeted conversion workflows.
 - Engineered a tiered usage-limits and paywall service with trigger-based quota enforcement in **TypeScript** and **Node.js**, protecting backend resources and supporting monetization.
 - Spearheaded a codebase refactoring of monolithic files exceeding **5,000+ lines** into decoupled components and centralized configurations, increasing team delivery velocity.
 - Drove a **2x surge in organic users (6k → 13k+)** in **2 months** by overhauling technical SEO, schema metadata, and Core Web Vitals across primary landing paths.
 - Co-developed generative **AI-powered product features** with senior engineers, integrating context-aware LLM endpoints to enhance real-time user workflows.
 - Resolved a production link-unfurling breakdown by tracing **Azure** blob path mismatches through server logs and deploying an automated resolution for zero downtime.
- PayZoll** Remote
Web Developer Intern Feb 2025 – Apr 2025
 - Spearheaded frontend migration from legacy Octo SDK templates to **Next.js** and strict **TypeScript**, enforcing end-to-end type safety and systematic component modularity.
 - Eliminated frontend rendering bottlenecks to reduce page load latency by **40%** and achieve a **95+ Google Lighthouse** score across primary customer dashboards.
 - Standardized reusable UI component libraries and conducted quality assurance reviews, streamlining sprint estimation and feature release reliability.

PROJECTS

- Beacon — Secure Communication Platform** | *Next.js, TypeScript, Firebase, Gemini API* [\[Code\]](#) [\[Live\]](#)
 - Engineered an enterprise-grade secure messaging platform featuring client-side **AES-256 encryption**, PIN-based MFA, and a real-time monitoring dashboard.
 - Implemented granular **Role-Based Access Control (RBAC)** and automated audit logging, ensuring airtight data privacy and zero unauthorized access.
- BitShred — Cryptographic Data Sanitization System** | *Next.js, TypeScript, Python* [\[Code\]](#) [\[Live\]](#)
 - Architected a data sanitization application combining a **Next.js/TypeScript** interface with a **Python** engine executing multi-pass cryptographic overwrite algorithms.
 - Automated compliance validation by generating verifiable cryptographic audit reports guaranteeing **0%** data recoverability on wiped storage sectors.

SKILLS SUMMARY

- Languages:** JavaScript (ES6+), TypeScript, Python, Java, C, C++, SQL, HTML5, CSS3, Go
- Frontend:** React.js, Next.js, Tailwind CSS, ThreeJS, GSAP
- Backend & Data:** Node.js, Express.js, Flask, Django, RDBMS/SQL, PostgreSQL, MongoDB (incl. Vector Search)
- Cloud & Tools:** AWS, GCP, Azure, Docker, Firebase, Supabase, Git, GitHub, Postman, Vercel
- Core Concepts:** DSA, System Design, REST APIs, AI-Integrated Development, Agile Collaboration, Quality Assurance

EDUCATION

- RCC Institute of Information Technology (MAKAUT)** Kolkata, West Bengal
B.Tech in Computer Science and Engineering Aug 2023 – Jun 2027
Relevant Coursework: Data Structures & Algorithms, Database Management Systems (RDBMS/SQL), Computer Networks, Operating Systems, Object-Oriented Programming, Software Engineering

HONORS, AWARDS & LEADERSHIP

- Grand Finalist** – Smart Bengal Hackathon 2025 (Team Leader, Top 30/500+ teams)
- Top 20 Contributor** – JWOC Winter of Code, ranked top 20 out of 10,000+ participants
- Web Development Lead, Google Developer Groups on Campus RCCIIT** – Directed technical web infrastructure and led student development initiatives
- Tech Lead, ACM Student Chapter RCCIIT** – Organized and mentored technical workshops and hackathons for 500+ students
- Web Developer, Student Welfare Community RCCIIT** – Engineered responsive event platforms and community portals
